G E Stedman

Updated June 2007

1. G E Stedman, *Green's functions* Contemporary. Phys., **9** 49--69 (1968).
Translation: '1a' G E Stedman, Greenovy funcke a jejich fysikalni vyznam Czech. J. Phys. A **20** 252--73 (1970).
2. M M Curtis, D J Newman and G E Stedman, *Crystal field in rare earth trichlorides IV Parameter variations* J. Chem. Phys. **50** 1077--1085 (1969)
3. G E Stedman, *Crystal field of ruby and stressed MgO:Cr³⁺* J. Chem. Phys **50** 1461--1466 (1969)
4. G E Stedman, *Semi-diagonal Raman process in spin-lattice relaxation* Phys. Lett **A29** 278--279 (1969)
5. D J Newman and G E Stedman, *Interpretation of crystal field parameters in the rare earth substituted garnets* J. Chem. Phys. **51** 3013-3023 (1969)
6. G E Stedman, *Interpretation of the crystal field for V²⁺, Cr²⁺ and Mn⁴⁺ in corundum* J. Chem. Phys. **51** 4123--4125 (1970)
7. D Bloor, J Dean and G E Stedman, *Spectroscopic observations of antiferromagnetic erbium oxide* J. Appl. Phys. **41** 1242--1244 (1970)
8. G E Stedman, *Ion-lattice relaxation processes and spectroscopic line widths* J. Phys. C. **3** 1055--1070 (1970)
9. G E Stedman and D J Newman, *Force constant models of lattice vibrations in rare earth halides* J. Phys. Chem. Solids **31** 1587--1593 (1970)
10. G E Stedman, *Broken symmetry* Science Progress **58** 507--523 (1970)
11. D J Newman, G E Stedman and M M Curtis, *The use of simplified models in crystal field theory in Les Elements des Terres Rares* (CNRS, Paris 1970) **1** 505-12
12. G E Stedman, *Raman ion-lattice interaction processes and the line width problem* J. Phys. C. **3** 2392--2401 (1970)
13. G E Stedman and D J Newman, *Crystal field in rare earth fluorides II. Parameters for Er³⁺ and Nd³⁺ in LaF₃* J. Phys. Chem. Solids **32** 109--114 (1970)
14. G E Stedman and D J Newman, *Spin-lattice relaxation and elastic properties for rare-earth substituted LaCl₃* J. Chem. Phys. **55** 152--161 (1971)
15. G E Stedman and D J Newman, *Crystal field in rare earth fluorides III Analysis of experimental data for the alkaline earth fluorides* J. Phys. Chem. Solids **32** 2001--2006 (1971)
16. G E Stedman, *Validity of the Weisskopf-Wigner line width-lifetime relation for spectral lines broadened by phonon interaction* J. Phys. C **4** 1022--1035 (1971)
17. G E Stedman and D J Newman, *Analysis of the crystal field in rare earth substituted oxysulphide and vanadate systems* J. Phys. Chem. Solids **32** 535--542 (1971)
18. G E Stedman and D J Newman, *Superexchange between Ir³⁺ ions in the hexachloroplatinates* J. Phys. C **4** 884--897 (1971)

19. G E Stedman, *Fermi's Golden Rule - an exercise in quantum field theory* Am. J. Phys. **39** 205--214 (1971)****
20. G E Stedman, *Lanthanide crystal field fitting routine* Computer Phys. Commun. **2** 191--200 (1971)
21. G E Stedman, *Linked cluster theorem for the Abrikosov pseudo-fermion representation of spin operators* Phys. Lett. **A35** 425--426 (1971)
22. G E Stedman, *Phonon-induced shift of spectral lines I General theory* J. Phys. C **5** 121--133 (1972)
23. G E Stedman, *A unidirectional test of special relativity?* Am. J. Phys **40** 782--784 (1972)
See also: G E Stedman, *Answer* Nature **244** (5410) 27 (1973)
24. G E Stedman, *Phonon-induced shift of spectral lines II Jahn-Teller splittings* J. Phys. C **5** 2665--2668 (1972)
25. G E Stedman and N.A. Cade, *Non-additive phonon-induced broadening in Nd³⁺:YAG* J. Phys. C **6** 474--478 (1973)
26. G E Stedman and M.J. McDonnell, *Optimisation of coherence properties of thermal sources by spatial filtering* J. Opt. Soc. Am. **63** 1222--1224 (1973)
27. G E Stedman, *Is the apparent speed of light independent of the sense in which it traverses a closed polygonal path?* Am. J. Phys. **41** 1300--1302 (1973)
28. G E Stedman, *Diagram techniques in quantum optics: radiative decay and broadening* J. Phys. **A7** L48--51 (1974)
29. G E Stedman and D J Newman, *Analysis of the spin-lattice parameters for Gd³⁺ and Eu²⁺ in cubic crystals* J. Phys. C. **7** 2347--2352 (1974)
30. S H Payne and G E Stedman, *Electrodynamics of rotating superconducting interferometers* Phys. Lett. **A50** 415--416 (1974)
31. G E Stedman, *A diagram technique for coupling calculations in compact groups* J. Phys. A **8** 1021--1037 (1975)
32. G E Stedman, *Interference between optical transitions broadened by phonon interaction* J. Phys. C **9** 535--551 (1976)
33. B J McKenzie and G E Stedman, *Drones, quasispin or isospin? A comparison of many-body techniques for general spin* J. Phys. A. **9** 187--195 (1976)
34. G E Stedman, *A diagram technique for basis functions and their transformation, with application to group-subgroup bases and crystal tensors* J. Phys. A. **9** 1999--2019 (1976)
35. R Anderson and G E Stedman, *Dual observers and operational relativity* Found. Phys. **7** 29--33 (1977)
36. S H Payne and G E Stedman, *Ion-lattice coupling, spectral moments and transition interference in Fe²⁺: MgO* J. Phys. C **10** 1549--1559 (1977)
37. S H Payne and G E Stedman, *A diagram approach to reduction factor calculations in Jahn-Teller systems* J. Phys. C **10** L671--675 (1977)
38. B J McKenzie and G E Stedman, *A quantum field theoretic formulation of Raman spectral line shapes* J. Phys. C **11** 589--603 (1978)
39. G E Stedman, *Effect of the electron-phonon interaction on vibronic peaks and on phonon lines in the absorption spectrum* J. Phys. C **11** 1017--1030 (1978)
40. G E Stedman, *Superexchange between one-particle states* J. Phys. C **12** 2859--2872 (1979)
41. B J McKenzie and G E Stedman, *Virtual phonon exchange between Kramers ions in a field-theoretic formalism* J. Phys. C **12** 5061--5075 (1979)
42. G E Stedman and P.H. Butler *Time reversal symmetry in applications of point group theory* J. Phys. A **13** 3125--3140 (1980)

43. G E Stedman, *Observability of static electromagnetic angular momentum* Phys. Lett. **A81** 15--16 (1981)
44. C D Churcher and G E Stedman, *Phonon Raman spectroscopy in systems with electronic degeneracy* J. Phys. C **14** 2237--2264 (1981)
45. C D Churcher and G E Stedman *Irreducible analysis of Raman spectra for all crystal point groups* J. Phys. C **14** 5707--5723 (1981)
46. G E Stedman and R.A. Minard, *Internal strain effects and the reduction of the number of ion-lattice parameters* J. Phys. C **14** 4753--4764 (1981)
47. R.J. Black and G E Stedman, *Diagram approach to group algebraic methods* Int. J. Quantum Chem. **21** 823--831 (1982)
48. C D Churcher and G E Stedman *Symmetry restrictions for natural and induced circular dichroism and optical activity for all point groups* J. Phys. C **15** 5507--5520 (1982)
49. G E Stedman and D M Pooke, *Compton scattering for circularly polarised light* Phys. Rev. D **26** 2172--2174 (1982)
50. C D Churcher and G E Stedman, *Geometrical dependence of Raman and Rayleigh scattering intensities in fluids* J. Phys. B **16** 1303--1318 (1983)
Also: C D Churcher, *Hyper-Raman scattering in systems with electronic degeneracy* Mol. Phys. **46** 621--628 (1982)
51. R A Minard, G E Stedman and A G McLellan, *Reduction of angular momentum coupling trees and polarisation dependence of nonlinear optical processes* J. Chem. Phys. **78** 5016--5024 (1983)
52. S.H. Payne and G.E. Stedman, *a field theoretic approach to the calculation of reduction factors in Jahn-Teller systems III $E \times (\alpha + \epsilon)$ in octahedral symmetry* J Phys C; **16** 2679-03 (1983)
53. S.H. Payne and G.E. Stedman, *a field theoretic approach to the calculation of reduction factors in Jahn-Teller systems I General theory* J Phys C; **16** 2705-2723 (1983)
54. S.H. Payne and G.E. Stedman, *a field theoretic approach to the calculation of reduction factors in Jahn-Teller systems I $\Gamma_5 \times \Sigma((\alpha + \epsilon + \tau))$ in octahedral symmetry* J Phys C ; **16** 2625-2758 (1983)
55. G E Stedman, *Space-time symmetries and photon selection rules* Am. J. Phys. **51** 750--755 (1983)
56. G E Stedman, *Visualising higher continuous symmetries in the Jahn-Teller effect* Eur. J. Phys **4** 156--161 (1983)
